

*Thank you for making masks!*

Johns Hopkins All Children's Hospital (JHACH) urgently needs handmade masks and has asked our HRH family for help. Your mask donations will help keep premature (and full-term) babies safe by protecting the babies, families, and health care workers who care for them.

JHACH has specific requirements for fabric and delivery and has entrusted HRH to distribute fabric and instructions. Please let us know if you are interested by emailing [info@highriskhope.org](mailto:info@highriskhope.org) and you will receive an email with more information. We hope your family remains healthy and well.

Thank you.
